Description Of Work:

Fixed my son's car

Member Comments:

My son's car began to overheat easily so we took it to Davie Garage. After checking the vehicle, they called my son and told him what was needed, as well as recommending replacing belts and general servicing needed at 100K miles. They gave him an estimate, which actually turned out to be about \$40 more than the final price, as one problem they thought existed turned out to be a simple fix.

They were prompt, honest, and great to deal with!

Recommending my husband take his car in to them for his brakes!

Description Of Work:

Davie Garage did a repair on my car. They ended up fixing a seal leak for me.

Member Comments:

I like that he is very honest, trustworthy, and he takes good care with you as far as anything with cars. He tells you like if your brakes are going to come to. They are fine now and in the future needs checking again. The most important things would be the honesty, trustworthiness, and the repairs are done well. I do not question anything he suggests. I just do it. He is a little bit slow though.

Description Of Work:

They diagnosed the problem, installed a new battery, and did some other work that needed to be done.

Member Comments:

I have been to Davie garage in the past with my old car, but hadn't needed to go until this week. Something went wrong with my car and thinking was a transmission, decided to take it to the dealer. What a big mistake! They diagnosed what was wrong with the car and gave me an \$1800 estimate. I was completely shocked and decided that since it wasn't the transmission, I would ask Robert at the Davie garage to check it out. He did, and all the things that they wanted to do to my car or not necessary, other than the battery.

Robert has always been completely honest about what needed to be done and I appreciate that. He could have told me that lots of different things were wrong, but he was truthful and did what needed to be done.

I highly recommend Davie garage!

Description Of Work:

General maintenance on my 2003 Lincoln LS (~150,000 miles): oil/filter change, ait filter, throttle service, belts/hoses checked, serp belt replaced, wipers, fluids.

Member Comments:

I have 4 vehicles - 2 have 150,000+ miles, a third has 65,000. Robert and Davie Garage keep me going and not needing to invest (hardly the right word) in a new car (except for my wife's). He only recommends what's necessary and never pads the job. Always gives customer the option. Only downsides are hours could be more convenient (he's only open M-F, until about 5:30 pm) and sometimes he's so busy that major work may take a few days. But it's all worth it. I always feel confident in the advice and the work.

Description Of Work:

Replace leaking power steering pump, replace wheel bearing and one axle.

Member Comments:

My 2007 Honda minivan had several non urgent issues. We were pleased to make an appointment with Davie Garage to have them corrected properly. The owner called us to tell us the power steering pump he installed was not working correctly and he was going to replace it with a dealer pump. The owner absorbed the cost of the more expensive pump. I offered to pay the difference or at least split the cost and he did not allow me to share the additional expense. This is the second time I have argued with an Angie's List provider because I wanted to pay more to be fair to the business. Excellent experience. Davie Garage is a first class operation.

oil change and filter, replace battery terminal, replace air filter, check belts and hoses, check tire pressure, clean & service mass air flow sensor & throttle bore & plate, check A/C, top-off freon, oil & dye, access and replace front sway bar links.

Member Comments:

I joined Angie's List specifically to search for a trustworthy, capable, and professional auto mechanic. Even though there were a couple of other places mentioned which were closer to my home, I decided to go with Davie Garage, in Davie, Florida. I am happy to say that I was very pleased with this recommendation. First I called to make an inquiry a few days before my visit, and the phone was answered promptly by a friendly voice. Through that phone call I learned that Davie Garage encourages appointments. I explained that I wanted an oil change, tune-up, and check on my air conditioner because the normal and maximum A/C settings were blowing the same rate. I agreed to leave my vehicle one evening after they closed and I used the key drop. The next morning around 10:30am, I received a call from their mechanic, Robert to confirm the services I wanted, and we discussed a few other quirky concerns I had about the vehicle. I received a call back about 11:45am explaining that it appeared the A/C only required some minor adjustments. Robert took the time to discuss the air conditioner issue, and unhurriedly answered all my questions. Robert also made several recommendations for my 2001 Ford Ranger, which I knew were quite overdue. I elected to follow through with a couple and put-off a couple for another time. I received a call at 3:55pm explaining the vehicle was ready for pick-up. Overall, I felt the service was fair, and knowledgeable, and amicable. I was happy with experience and intend to return for future services.

Description Of Work:

Oil change, filter, rotate tires

Member Comments:

This independent garage provides trust-worthy advice and repair of automobiles. Services are priced fairly and below what one would pay at a auto dealership. More important--the owner is an honest, ethical person, with whom I have total trust. The quality of their work is excellent; if something is broken, it is fixed, and the repair price is what is quoted before the work is done. This is one of Broward's best companies, and is locally owned and operated.

Description Of Work:

went in to have brakes and alignment done and was pleased to receive a call telling me that I didnt need brakes yet. They could have just done the brakes and i would be none the wiser. Robert suggested that i do a 60,000 mile service, flushing/replacing fluids and wiper blades. It was nice to have someone look over the entire vehicle instead of me just paying someone to complete " a service" and send me on my way.

When i finally need to get my brakes done i will gladly go back.

Description Of Work:

Inspected brakes and noise from axle.

Member Comments:

This was my first visit to Davie Garage. I took my vehicle to them convinced that I needed new brakes. I also had a rubbing sound at low speed and I didn't know what was causing it.

I dropped the vehicle off for it to be inspected for an estimate. When they called me later they said it didn't need new brakes and the rubbing sound was nothing to worry about. No charge for the inspection. They test drove the vehicle, inspected all the brakes and even found a couple of items for me to keep an eye on that might need maintenance soon.

I know mechanics have a wide discretion in deciding what work is needed and the fact that these guys concluded that nothing was required and did not charge me for the inspection tells me they are honest and not looking to justify work.

The place was super clean and the mechanics' work areas were very organized. They also have their scheduling and customer communications well managed. There is a nice lady who works the front desk who is very responsive.

As soon as my vehicle does need work it is going back here.

Description Of Work:

Found the source of a severe "rumble" evident when the car starts, which becomes much worse when the A/C was engaged. Also requested that they lower the idle.

Member Comments:

Job was diagnosed promptly. The tensioner on my Altima had become defective after 110 k miles and probably affected the Alternator as well. They replaced both, found that my idle problem was related to a gumming of the IAC valve, which they cleaned. They also found a bolt missing from my brake caliper, which could have caused an accident! The office staff is very professional. I will definitely use them in the future. Mr Robert Tubach was very good at explaining my vehicle's problems.

Description Of Work:

After several years of neglect, my 2001 Ford Escape needed a whole host of repairs. Many I knew about, while Davie Garage discovered many others during a comprehensive bumper-to-bumper check. The list included:

- new tires
- throttle body maintenance
- oil/filter change
- rear driver side window motor replacement
- passenger mirror replacement
- full break work front and back
- front crank seal replacement
- air filter replacement
- fuel filter replacement
- serpentine belt replacement
- water pump
- engine idle problem repair
- engine electrical system warning light repair

There was a long list of necessary actions.

Member Comments:

Robert took a great deal of time to answer my questions before I chose Davie Garage. Then, after his review of the vehicle, he provided an itemized breakdown of costs divided into parts and labor. I chose 5-6 and called around to compare prices. Robert's price beat all except the tires, which were cheaper at Costco -- but b/c the car was already there, I chose to go with Davie on the tires anyway. It was an extra \$65, but well-spent for the convenience.

It was very important to me that Robert talked me through every single item -- why the recommended repair was necessary, the risk if I chose to not repair it, and the implications delaying. I chose to do everything on the list, though there were a few I could have held for a later repair date.

There was no rush on my side to get the car back, so it stayed at the garage for a week; I got the impression it could have been ready earlier, but it wasn't necessary for me, so I didn't press for a more rapid return.

Upon pickup, Robert again talked me through each item. He was clearly very familiar with the work on the car, and highlighted another problem that was discovered during the oil change (I stripped the threads on the oil pan during my last oil change...cheap aluminum pan!), and described the clever repair the shop used.

To his credit, Robert gave me a \$100 active duty military discount. It's good to know the shop supports the military. Overall, I am very pleased with the experience and believe this to be a very reputable garage worthy of all of my future vehicle repairs.

Description Of Work:

Inspection and diagnosis.

Member Comments:

After receiving a quote from a local garage, I took my 2003 Mercedes to Davie's Garage to get estimates on some upcoming expensive repairs. They gave me a quote on my current repair needs. In addition (as a woman) car repairs are not my strong point, so I was given a detailed explanation of the proposed work.

The costs are starting to rise on this older car and Dave gave me good advice and something to think about when it comes to high repair costs on this type of car versus when is it the time to sell the vehicle.

He didn't push me into repairs and advised me to get the tires (not at his garage) which is the most important one due to safety, while I decide if I am going to keep the car or trade it in.

There was no charge for the inspection and diagnostic test on the car. I will definitely go back to this garage whether it be for this car or a future purchase.

Idle surge issues. Fault trace circuit. Service/clean throttle bore & plate. Repair A/C system: compressor, accumulator, expansion valve, flush, evacuate, recharge. Replace fuel filter. secure front wheel well skirt.

Member Comments:

After my mechanic retired about a year ago, I was in search of a local shop I could trust. I joined Angie's List for that purpose. The reviews of the Davie Garage led me to Robert Tubach and I was sold. The shop is clean, the mechanics are well qualified, and Robert earned my trust. He treated my car like a patient at a doctor's office. After hearing my unqualified diagnosis, he examined the new patient and provided a report of what was needed. His estimates were detailed and accurate. His receipt was equally detailed and neatly written. I was pleased with the honesty and transparency at the shop. Although the repairs totaled over \$1,000, I did not feel cheated, pressured, or tricked. My car was repaired promptly and I left a satisfied customer. The Davie Garage is my new service station. I will continue to take all of my cars to the Davie Garage. (Vehicle repaired: 2007 Ford 500 SEL)

Performed system check due to check engine light on. Found codes for oxygen sensor bad, transmission problem, and catalytic converter . They replaced oxy. sensor, performed transmission service, tune-up, cleaned throttle body, replaced leaking gasket on engine, flush cooling system and replace wiper blades. They repaired everything to my complete satisfaction, checked out car bumper to bumper told what needed to be done and what I can wait on. The catalytic converter was an expensive and was borderline so he said I can wait on replacing it. One tire had a plug that was on side wall and he suggested i change it. He said if I wanted to I could just replace 2 tires and then at next rotation replace the other 2 but I went ahead and replaced all 4 tires at a very reasonable price. And he mounted and balanced also. He also found an a/c hose that needed to be reattached, he did not charge me extra for that repair.

Member Comments:

I used them after looking him up on Angies List and found to be honest, professional, and courteous. They were a little further then I normally travel to have my car serviced or repaired but they were more than worth the extra travel. They wrote up estimate and it came in at exactly that price. I will highly recommend them to all my friends and family. Keep up the good work Davie Garage you have a customer for life now.

Description Of Work:

I had been having difficulty with my gas mileage (a raids decrease in mileage per tank) so I took it to Davie Garage, after reading the positive reports on angies list. Robert was very thorough in explaining the potential problems and he was very honest. I brought my car in the next day to be serviced.

Member Comments:

We had a great experience with Davie Garage. We brought the car in at 8:15 a.m. and Robert called both my husband and me by 11:00 a.m. to explain every item on his list. I received a call by 2:00 p.m. to tell me the car was ready! My husband and I were very impressed with Robert and staff's attentiveness and honesty.

Timing Belt complete job

Brakes

Fuel Filter

Member Comments:

The quotation was very accurate. Bob called to detail every part that will be replaced. He is quite patient if you have questions. They have paperwork ready when you arrive so that you don't stand in a queue. You just deliver the keys. The vehicle was ready in time. The quality of the service was very good.

Consumer Reports recommends that independent repair shops provide the best service. You just need to find a knowledgeable, honest shop. I would recommend customer to try Davie Garage.

Description Of Work:

I stopped in a little after 9am on a Friday, as I noticed something hanging from the front undercarriage of my car. It turned out to be nothing, but I asked them to recharge my air conditioning. The fellow behind the desk said it would be \$65 for the Freon. It took about an hour as they had to change over to the newer Freon, and \$45 in labor plus tax. My mother brought her car into Meineke for the same and they charged \$75 total, but perhaps she didn't need as much. They were very nice, and they talked to me like a person and not a "dumb woman", which I greatly appreciate.

Description Of Work:

They replaced the bolts that attached the heat shield.

Member Comments:

I called one morning to see if they could replace the bolts that hold on the heat shield. They were able to fit me in that day and had it fixed a few hours later. I couldn't believe they only charged \$40. I've never paid so little at a car mechanics before. I have had no problems since then. I would definitely use them again.

Description Of Work:

They did the 90,000 mile service on my Toyota.

Member Comments:

They will always let you know if something needs to be done when it's coming up. A couple of years ago, they let me know that my timing belt would need to be done soon. They are thorough. I don't know if their prices are the cheapest, but they are very trustworthy and wouldn't do anything that didn't need to be done.

Description Of Work:

We use Davie Garage for auto service. The last time we used them was 3 months ago and they changed the oil and also fixed the steering.

Member Comments:

We paid about \$30 for the oil change. We used them a couple of times and they put in a new engine in my husbands truck. They have been around for 30 years and are family owned and have a really good reputation in the town.

Description Of Work:

We have an older Taurus which both of my teenage kids have learned to drive on. It was having a lot of different problems. We needed someone to look over to see if it was worth repairing or not. We wanted to make sure it would be safe to drive.

Member Comments:

They were extremely helpful in this situation. They could have charged us in this situation or hiked up the bill. They told us the basic things that needed to be fixed for safety. They went ahead and did the work. With the exception of one other thing we had to have fixed, it's been running fine. It could have cost us over \$2000. They gave us the lowest price to get what we needed to get done.
